

## Colour chart of residual chlorine content

Instruction: 3 or 4 drops of residual chlorine reagent dip into 30ml of water sample and shake well, then compare the water colour with the colour chart.

If the water colour does not change, it shows that the water sample does not contain residual chlorine.

Caution: Do not heat; keep away from the flame.

Brand: (SeaSun)

Product Name: SeaSun (Tester) Residual Chlorine Reagent

10ml (30 tests)
