SLW-10 SINE DRIVER

Controller Included

Jebao® 捷寶

since 1999

No Guarantee Jebao SLW-10 flow pumps (sine wave) is the latest pump from Jebao with a very wide diffuse outflow, which results in virtually no dead slabs / places where there is no flow.

These flow pumps are supplied with a controller (External drive controller)

The big advantage of these new pumps is that there are no electronic components in the pump, but that everything is almost in the controller.

These new pumps also have sine wave technology, which results in a very quiet operation.

Product Description :
This compact pump is attached to the aquarium wall with magnets and protrudes only about 1.5-2 inches (up to the model) into the tank, making it very easy to hide.
The SLW pumps can go down as low as 10% power, or as high as 100% power (may be change after update on App)

Features :
 - Easy installation and maintenance, Fixed with magnetic suction

and absorption tray for selection

- Direction of wave can arbitrary rotation
- High performance, powerful water flow and low energy consumption.
- Adopt wear proof ceramic shaft can be used in a longer time.
- Intelligent controlling system, can convert various wave patterns.
- Low voltage operation, safe and reliable.
- Suitable for fresh water and marine water.
