Benefits :

Increase of pH 0.1 and KH 1°dKH per dose immediately after added.

Informations :

ReefLifeElite^R Dosing B+BufferTM is pH buffer and alkalinity or carbonate hardness (KH) adjusting system designed for reef and marine fish. Provides a stable pH environment. Compatible with and designed for use with **ReefLifeElite^R Dosing C+CalciumTM** and **ReefLifeElite^R Dosing M+MagnesiumTM**. Free of polluting nitrates, phosphates, silicates, and organic chemicals!!! Our design is the powder for save-cost of freight charge. But the powder form can not wash so maybe has dust after the dissolved, it does not effect in any quality. If you want the clean type please looking the **ReefLifeElite^R KH+AlkalinityTM** in the powder form.

Ingredients :

Potassium 50% , Hydroxide 45% and Bicarbonate 5%

Directions :

1) Fill full with dechlorinated tap or purified water. We recommend the use **PetLifeElite^R Clear+ifierTM** to neutralize any tap water chlorine and chloramines.

If source water quality is poor we recommend purification with RO/DI system.

2) Shake well to ensure a good mix. After that the temperature and pressure to high DO NOT CLOSE THE CAPFUL!!!! wait until the temperature constant.

3) Calculate the total system water volume. The addition of 1 capful (10ml) of solution will raise the pH 0.1 and KH 1odKH (CaCo₃ 10ppm) of 100 liters directly to filter tank, wait minimum 1 minute before add other solution.

Maximum recommended dose is 30 ml per 100 liters per day.

Do not mix **ReefLifeElite^R Dosing B+BufferTM** with **ReefLifeElite^R Dosing C+CalciumTM** or **ReefLifeElite^R Dosing M+MagnesiumTM** together.

If use with automatic dosing pump we recommend programming at 2 ml per 150 liters per day. adjust as necessary to maintain level the pH at 8.0-8.4 and KH at 7-10°dKH **One capful of the 1,000ml package is 15ml.**

One capful of the 5 liters package is 20ml.

One capful of the 20 liters package is 50ml.

To Calculate :

How much does your tank need to fill?

Width (inch) x Length (inch) x Height (inch) / 5,120 = Volume (ml)

For example : 20" x 48" x 20" / 5,120 = 3.75 ml

Width (cm) x Length (cm) x Height (cm) / 80,000 = Volume (ml)

For example : 50 cm x 120 cm x 50 cm / 80,000 = 3.75 ml

Remark :

Keep out of reach of children.

Not for human consumption fishes.

For aquarium and pond use.

In case of contact with hands or eyes rinse with plenty of water.
