Benefits :

100% natural sand, not synthetic sand safe for living things help the color of the fish to stand out.

Infomations :

PetLifeElite[®] BlackLiveSands[™] come from beach in California is a 3.5 mile beach that is located nearby Shelter Cove town. This beach is renowned by a tiny and well-spoken black pebbles that cover a silt and give it a pleasing black color.

PetLifeElite[®] BlackLiveSands[™] very clean by washing processes and disinfection with UV & ozone before add deionized water then add Nitrosomonas and Nitrobacter.

PetLifeElite[®] BlackLiveSands[™] contains not add the broad spectrum of bacteria found in the natural, but additional specially selected strains of bacteria as well.

PetLifeElite[®] BlackLiveSands[™] compresses new tank cycle time and suppresses the initial ammonia spike.

PetLifeElite[®] BlackLiveSands[™] creates a natural biological balance, and makes cycling a new aquarium faster and safer. Live corals and most invertebrates can be added immediately. Gradually introduce fish within the first 3 weeks, and do not exceed one inch of fish per 5 gallons (20 liters) during this time.

PetLifeElite[®] BlackLiveSands[™] is a good intermediate sand size product. The precise 0.1 - 1 mm grain size combines some of the animal friendly properties of fine sand such as ingestibility and low resistance to burrowing, but with better diffusive flux properties and good porosity. This is also the standard choice for reef aquariums at 170 fl oz (5 liters) per 10 gallon (40 liters).

PetLifeElite[®] BlackLiveSands[™] is suitable the DSB (Deep Sand Base) system, it makes the system has pH stabilized. This system for reef aquarium at 170 fl oz (5 liters) per 15 inc² (100 cm²)

PetLifeElite[®] BlackLiveSands[™] safe for reptile such as spider or iguana, they can safely eat sand.

Materials :

Natural Sand 100% (The Black Sands Beach in California) , Deionized water

Extra : Nitrosomonas and Nitrobacter (**PetLifeElite[®] NitroBacteriaL[™]**)

Contain no ammonia, nitrate, phosphate. Microbiological, parasitological and virological analyses PetLife Laboratory, CA, USA. None of Salmonella , Listeria monocytogenes, Helminthes (viable eggs) and Enterovirus.

Directions :

Product ready to use. Do not to rinsing the sands !!!!!

1) Place and arrange large decorative rocks on the bottom to strength.

2) Pour PetLifeElite[®] BlackLiveSands[™] with water onto the bottom of the aquarium. And spread around the base of the large rock. Depth adjustable as desired.

3) Place and arrange small decorative rocks or live rocks as desired.

4) Add water to full systems, and run filter system.

5) Add PetLifeElite[®] NitroBacteriaP[™] and waiting the water clear within 2-3 hours.

To Calculate :

How much does your tank need to put?

Width (inc) x Length (inc) x Depth of soil (inc) / 64 = Volume of sand

For example

20" x 48" x 1" / 64 = 15 liters of sand

Width (cm) x Length (cm) x Depth of soil (cm) / 1000 = Volume of sand

For example

50 cm x 120 cm x 2.5 cm / 1000 = 15 liters of sand

Remark :

Keep out of reach of children.

Safe for human consumption fishes.

For Freshwater & Saltwater aquarium use.

Also safe for reptile use.
