Benefits :

Collects dust larger than the specified size to remove it from the system. Also, it can reduce the protein content in the water. Make it clear and cleaner water.

Informations :

PetLifeElite[®] FilterSock[™] is high efficiency filter bag in the structure unique it has many layers of filtering layer gradient distribution of composition, with a maximum of 15 layers of different density and the accuracy of the filter material gradient composition, in order to achieve stable and efficient filtration efficiency and dirt holding capacity, and greatly improve the service life of the filter bag.

High efficiency filter has the ability to absorb hydrocarbons (oil) from a large number of internal structure. Firtec efficient filter bag can provide particle filtering precision absolute and high volume capacity. Made of polypropylene fiber with good chemical stability. Micron grade superfine fiber has very high particle capture ability. This unique product can be used in most industrial areas, the highest filtration efficiency can reach 99.9%.

Materials :

Filter Cloth : 100% Nylon cloth or 100% PP cloth

Neck Ring : 100% PE Plastic

Directions :

Installed to the sewer to trap dirt.

Wash regularly when the water overflows, it depends on the size and quantity of waste in the aquarium.

We recommend soaking in the **PetLifeElite[®] ChlorineP[™]** for safety and clean like new at least once a month.

Replace when damaged, overflows faster than usual or at least 6-12 months.

Remark :

Keep out of reach of children.
