

Barcode : 009989073128
Weight : 4.4 oz / 125 g
Volume : 4.3 fl oz / 125 ml
Treat up to : 3.3 gallons / 12 liters
Packaging : PET Bottle

In the product development process. We test materials and production processes to obtain advanced quality products. But when we enter the production line in large quantities using a high-heat ceramic furnace to obtain the desired porosity exchanged with the machine used to produce. The machine has a heat limit. We only produced around 10 tons and found that the production machine was damaged. We consult with furnace manufacturers about the ability to produce products according to the specs we want. It's such a high value that we don't think it can be marketed. So we have to stop producing this product until we solve this problem. Therefore, **PetLifeElite[®] NitroRings[™]** is only available for a limited.

Benefits :

Reduce ammonia / ammonium and nitrite after addition within 7 days.

Infomations :

PetLifeElite[®] NitroRings[™] is another step of development from **PetLifeElite[®] CeramicLiveBioRings[™]**. We add carbon powder in the ceramic mixture to have strong but lighter weight and high porosity structures house our bacteria.

Freshwater & Saltwater suitable.

Materials :

Ceramic 85% , Carbon 15%

Deionized water Extra : PetLifeElite[®] NitroBacterial[™] (Bacillus subtilis sp., Bacillus licheniformes, Bacillus megaterium Nitrosomonas, Nitrobacter and Vodka source.)

Contain no ammonia, nitrite, nitrate, phosphate and calcium carbonate. Microbiological, parasitological and virological analyses PetLife Laboratory, CA, USA. None of Salmonella , Listeria monocytogenes, Helminthes (viable eggs) and Enterovirus.

Directions :

Ready-to-use products.

Pour **PetLifeElite[®] NitroRings[™]** with water into the filter tank or the canister. Can be put in a filter bag for easy removal.

To Calculate :

How much does your tank need to put?

Width (inch) x Length (inch) x Height (inch) of tank / 3,840 = (min) Volume (liters)

For example : 20" x 48" x 20" / 6400 = minimum 3 liters

Width (cm) x Length (cm) x Height (cm) of tank / 60,000 = (min) Volume (liters)

For example : 50 cm x 120 cm x 50 cm / 100,000 = minimum 3 liters

Filters are rated according to the size of your fish tank. Assuming you chose an appropriate aquarium, it should be able to fit all the ceramic rings you needed for good biological filtration. Up to the result, if the water is cloudy, it means that the volume of ceramic rings is not enough. If you have room to add more, then do it !!!

Usage rate of 1 liter per 100 liters of water can eliminate ammonia and nitrite up to 100ppm per day, and if using 1 liter per 20 liters of water can eliminate can be nitrate with a denitrifying system up to 50ppm per day.

PetLifeElite[®] NitroRings[™] can be used for a lifetime, can be added unlimitedly, and can be used in the next tank without expiration (Best Before on the side of the package only indicate the age of bacteria contained in the package) Once the package is opened and the bacteria are activated in the system. It only working 7-14 days, so we recommend adding **PetLifeElite[®] NitroBacterial[™]** weekly for the best results.

Specification :

Diameter : 12x12 mm

Area Surface : 2640m² / liter

Benzene Adsorption :

100%

Moisture Content : 100%

Ash Content : 0%

PH : Not Effect

Hardness : 85%

C.T.C. : 80%

Contact Time : 15 mins

Remark :

Keep out of reach of children.

In case of contact with hands or eyes rinse with plenty of water.

Safe for human consumption fishes , shrimps and crabs.

For aquarium and pond use.
