zzz>>>>>>>>> NeptuneSystems \_

Based in Morgan Hill, California, Neptune Systems is a market leader in the area of aquarium technology products. Beginning 20 years ago with a simple aquarium controller, Neptune Systems has grown into a multi-million-dollar company with brand recognition and an engaged customer base in the marine aquarium market.

Now on the fifth-generation of its flagship product, the Apex aquarium monitoring and control system, Neptune Systems has established absolute market dominance in the aquarium controller space worldwide. Additionally, Neptune Systems has found new success by expanding its product line into other ancillary aquarium products that integrate with its Apex, or operate standalone.
