**ReefLifeElite<sup>®</sup> Dosing M+Magnesium<sup>™</sup>** is present in natural sea water in a fairly high concentration (1350-1500ppm.) Magnesium is an essential part of chlorophyll, which is necessary for photosynthesis. Without photosynthesis algae and hence the corals, which we have in our aquariums, would not survive. Magnesium also has another important function in that it allows maintaining the correct combination of calcium concentration and alkalinity or carbonate hardness possible. **ReefLifeElite<sup>®</sup> Dosing M+Magnesium<sup>™</sup>** is a ionically balanced product which will safely raise the magnesium level in any reef system without upsetting the ionic balance of the system. Compatible with and designed for use with **ReefLifeElite<sup>®</sup> Dosing C+Calcium<sup>™</sup>** and **ReefLifeElite<sup>®</sup> Dosing B+Buffer<sup>™</sup>**. Free of polluting nitrates, phosphates, silicates, and organic chemicals! Our design is the powder for save-cost of freight charge. But the powder form can not wash so maybe has dust after the dissolved, it does not effect in any quality. If you want the clean type please looking the **ReefLifeElite<sup>®</sup> MagnesiumL<sup>™</sup>** in the liquid form.

**Ingredients :**

Free Magnesium Ion 100%

**Directions :**

1) Fill full with dechlorinated tap or purified water. We recommend the use **PetLifeElite<sup>®</sup> Clear+ifier<sup>™</sup>** to neutralize any tap water chlorine and chloramines.

If source water quality is poor we recommend purification with RO/DI system.

2) Shake well to ensure a good mix. After that the temperature and pressure to high DO NOT CLOSE THE CAPFUL!!!! wait until the temperature constant.

3) Calculate the total system water volume. The addition of 1 capful (10ml) of solution will raise the magnesium level of 100 liters by approximately 30 ppm. directly to filter tank, wait minimum 1 minute before add other solution.

Maximum recommended dose is 90 ml per 100 liters per day.

Do not mix **ReefLifeElite<sup>®</sup> Dosing M+Magnesium<sup>™</sup>** with **ReefLifeElite<sup>®</sup> Dosing B+Buffer<sup>™</sup>** together.

If use with automatic dosing pump we recommend programming at 2 ml per 150 liters per day. adjust as necessary to maintain level magnesium at 1,200-1,400 ppm. One capful of the 1,000ml package is 15ml.

One capful of the 5 liters package is 20ml.

One capful of the 20 liters package is 50ml.

**To Calculate :**

**How much does your tank need to fill?**

**Width (inch) x Length (inch) x Height (inch) / 5,120 = Volume (ml)**

*For example : 20" x 48" x 20" / 5,120 = 3.75 ml*

*Width (cm) x Length (cm) x Height (cm) / 80,000 = Volume (ml)*

*For example : 50 cm x 120 cm x 50 cm / 80,000 = 3.75 ml*

**Remark :**

Keep out of reach of children.

In case of contact with eyes or hands rinse with plenty of water.

Safe for human consumption fishes , shrimps and crabs.

For aquarium and pond use.
