40,000 liters

Barcode :

009989022805

Volume :

1.7 fl oz / 50 ml

Treat up to :

500 gallons / 2,000 liters

Packaging :

Green Glass Bottle

Benefits :

Decrease of pH 0.1 per dosage immediately after added.

Informations :

PetLifeElite[®] pHDownL[™] is citric acid buffer to lower pH. It is designed for the planted and reef aquarium or for very hard water where phosphate buffers may pose an algae or cloudiness problem.

PetLifeElite[®] pHDownL[™] lowers pH and buffers between 2.1 and 7.4.

As **PetLifeElite[®] pHDownL[™]** lowers pH it not converts carbonate alkalinity (KH) into available Co2 . It may also be used to safely lower pH in saltwater. **pH Adjustment :**

PetLifeElite[®] pHDownL[™] can be used to lower the pH of aquarium water, making it more acidic. This could be beneficial if you have specific species of fish or plants that require lower pH levels. However, **PetLifeElite[®] pHDownL[™]** can lead to pH fluctuations if not used carefully, so it should be used cautiously and with regular pH monitoring. **Algae Control :**

Some hobbyists use **PetLifeElite[®] pHDownL[™]** as a natural method for controlling certain types of algae, particularly algae that thrive in high pH environments. Lowering the pH with **PetLifeElite[®] pHDownL[™]** can inhibit the growth of these algae. However, it's important to note that sudden pH changes can stress fish and other inhabitants, so any pH adjustments should be gradual and closely monitored.

Ingredients :

Deionized water, Citric Acid food grade.

Contains no nitric acid, phosphates, nitrates, gluconates, lactates or any chemical.sugars.

Directions :

Shake well before using.

FOR NANO TANK USING :

Add one drop for every 1 gallon (3 liters) once a week.

FOR AQUARIUM and HYDROPONICS USING :

Add 15 ml (1 capful) per 150 gallons (600 liters) in a high flow area of the sump. Add daily until desired pH is reached. Larger doses may be required in very hard (KH) or alkaline waters. Add in the night to prevent overshoot of pH. Adjust dosage according to individual requirements (use **PetLifeElite[®] pHTest[™]) every 5 ml per 50 gallons (200 liters) will decrease the pH level by approx 0.10. Do not exceed 5 ml of this product per 50 gallons (200 liters) per 24 hour period.**

One dropper of the 50ml package is 0.1ml.

One dropper of the 100ml package is 0.1ml.

One capful of the 250ml package is 15ml.

One capful of the 300ml package is 15ml.

One capful of the 500ml package is 15ml.

One capful of the 1,000ml package is 15ml.

One capful of the 5 liters package is 20ml.

One capful of the 20 liters package is 50ml. **pH range recommended :**

Arowana 6.0 - 7.0

Betta 6.0 - 8.0

Discus 5.0 - 6.5

Goldfish 7.2 - 7.6

Koi 7.0 - 8.6

Malawi 7.7 - 8.6

Tanganyika 7.3 - 8.0

Planted aquarium 5.5 - 6.5

Marine aquarium 8.0 - 8.5

Reef aquarium 8.2 - 8.4

To Calculate :

How much does your tank need to fill?

Width (inch) x Length (inch) x Height (inch) / 2,560 = Volume (ml)

For example : 20" x 48" x 20" / 2,560 = 7.5 ml

Width (cm) x Length (cm) x Height (cm) / 40,000 = Volume (ml)

For example : 50 cm x 120 cm x 50 cm / 40,000 = 7.5 ml

Remark :

Keep out of reach of children.

In case of contact with eyes or hands rinse with plenty of water.

Not for human consumption fishes , shrimps and crabs.

For aquarium and pond use.
