Jebao (Wave Pump) SW- 4 (4000 L/hr)(24 VDC) Baht 1,800.00

shop.flypage_lite.php com_virtuemart 4

No Guarantee The SW Series of propeller pumps succeed the very popular WP and RW line.
The SW pump has a different look to widen the flow and also make them quieter than the already silent WP's.
The controller has design changes.
Multiple pumps can now be controlled together in a

master/slave format from a single controller.

The controller will communicate with the designated slave pumps wirelessly, and can handle up to 8 slave pumps.

Each slave pump's output can be adjusted individually, while the master pump controls the wave function.

There is also a 'Feed' button and a light sensor to reduce flow at night.

The new SW series has 8 different selectable flow rates down to 10%, while the older WP only had 3 choices (100%/75%/50%).   **Product Description**

This compact pump is attached to the aquarium wall with magnets and protrudes only about 3/4 inches into the tank, making it very easy to hide.

The pump includes a controller that can link with up to 8 other RW and SW pumps wirelessly, and has several wave functions.

The SW pumps can go down as low as 10% power, or 100 gal/hour, or as high as 100% power, or 1,000 gal/hour.

Each slave pump's output can be adjusted individually, while the master pump controls the wave function.

The SW-4 is equivalent to the WP-10 in output, and similar in size, and quieter than the WP-10.   Features：

 ■ Easy installation and maintenance,Fixed with magnetic suction and absorption tray for selection

 ■ Direction of wave can arbitrary rotation

 ■ High performance,powerful water flow and low energy consumption.

 ■ Adopt wear proof ceramic shaft can be used in a longer time.

 ■ Intelligent wireless controlling system,can convert various wave patterns.

 ■ Low voltage operation,safe and reliable.

 ■ Suitable for fresh water and marine water.
