## Barcode 000116051606 Flourish Product Description

Flourish<sup>®</sup> is a comprehensive plant supplement for the natural freshwater aquarium. It contains a rich assortment of important micro elements, trace elements and other nutrients. These include calcium, magnesium, iron and other important elements that have been shown to be beneficial to aquatic plants. View a [chart](#) of Flourish<sup>®</sup> constituents and signs of their deficiency. For macro element (NPK) fertilization, use [Flourish Nitrogen](#)<sup>®</sup>, [Flourish Phosphorus](#)<sup>®</sup> or [Flourish Potassium](#)<sup>®</sup> as needed. Sizes: 50 mL, 100 mL, 250 mL, 500 mL, 2 L, 4 L, 20 L **Why It's Different** Unlike competing products, Flourish<sup>®</sup> is designed to be used in conjunction with other macro and micro-nutrient supplements. Other manufacturers try to include ALL necessary nutrients, leading to overdoses of micro-nutrients in an attempt to raise macro-nutrient levels. **Directions** Use 1 capful (5 mL) for each 250 L (60 gallons\*) once or twice a week. For smaller doses, please note that each cap thread is approximately 1 mL. Refrigeration after opening is recommended but not required. **Guaranteed Analysis**

Total Nitrogen	0.07%
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	0.01%
Soluble Potash	0.37%
Calcium (Ca)	0.14%
Magnesium (Mg)	0.11%
Sulfur (S)	0.2773%
Boron (B)	0.009%
Chlorine (Cl)	1.15%
Cobalt (Co)	0.0004%

Derived from: Potassium Chloride, Calcium Chloride, Copper Sulfate, Magnesium Chloride, Ferrous Gluconate, Cobalt Sulfate, Magnesium Sulfate, Manganese Sulfate, Boric Acid, Sodium Molybdate, Zinc Sulfate, Protein Hydrolysates.

Some components are no longer listed in the Guaranteed Analysis due to state regulations. The formulation of this product has not be altered.

## Seachem Planted Aquarium Dosing Chart

It won't always be necessary to dose your aquarium with each of the products in the Flourish line, but as an example, we have developed one possible dosing regimen using all of our plant products. This is by no means the only way to dose your aquarium; it is merely a suggestion. Your dosing regimen will depend greatly on a variety of factors, including lighting, initial water quality, how heavily stocked your aquarium is, substrate selection, and types of plants; so don't be surprised if getting the results you want takes a little experimentation.
