zzz>>>>>>>>>>> Bakker Magnetics _

Bakker Magnetics specialises in the development, testing and production of magnetic solutions. What is our strength? Using the right knowledge and experience, the best experts and the most up-to-date facilities.

The headquarters of Bakker Magnetics is located in Son, just outside Eindhoven, in what has become the epicentre of the hi-tech industry in the Netherlands. Bakker Magnetics' dealerships and agencies can however be found worldwide. This means that the company's production facilities cannot only be found in locations such as Son, in the Netherlands, but also in the form of a joint venture in China, the birthplace of the magnetics industry.
