

Benefit :

ReefLifeElite^R CoralLiveSands5TM very clean by washing processes and disinfection with UV & ozone before add deionized water then add nitrosomonas and Nitrobacter.

ReefLifeElite^R CoralLiveSands5TM contains not add the broad spectrum of marine bacteria found in the ocean, but additional specially selected strains of marine bacteria as well.

ReefLifeElite^R CoralLiveSands5TM compresses new tank cycle time and suppresses the initial ammonia spike.

ReefLifeElite^R CoralLiveSands5TM creates a natural biological balance, and makes cycling a new aquarium faster and safer. Live rocks and most invertebrates can be added immediately. Gradually introduce fish within the first 2 weeks, and do not exceed one inch of fish per 50 gallons (200 liters) during this time. The best result we recommend use with **PetLifeElite^R NitroBacteriaPTM** together.

ReefLifeElite^R CoralLiveSands5TM is a good intermediate sand size product. The precise 3 - 5 mm grain size combines some of the animal friendly properties of fine sand such as ingestability and low resistance to burrowing, but with better diffusive flux properties and good porosity. This is also the standard choice for reef aquariums at 170 fl oz (5 liters) per 10 gallon (40 liters).

ReefLifeElite^R CoralLiveSands5TM is suitable the DSB (Deep Sand Base) system, it makes the system has stabilized, both calcium and pH. This system for reef aquarium at 170 fl oz (5 liters) per 80inc² (500 cm²)

Directions :

Product ready to use. Do not to rinsing the sands !!!!!

1) Place and arrange large decorative rocks on the bottom to strength.

2) Pour ReefLifeElite^R CoralLiveSands5TM with water onto the bottom of the aquarium. And spread around the base of the large rock. Depth adjustable as desired.

3) Place and arrange small decorative rocks or live rocks as desired.

4) Add water to full systems, and run filter system.

5) Add PetLifeElite^R NitroBacteriaPTM and waiting the water clear within 2-3 hours.

To Calculate :

Width (inc) x Length (inc) x Depth of soil (inc) / 64 = Volume of sands

For example

20" x 48" x 1" / 64 = 15 liters of sands

Width (cm) x Length (cm) x Depth of soil (cm) / 1000 = Volume of sands

For example

50 cm x 120 cm x 2.5 cm / 1000 = 15 liters of sands

Ingredients :

Natural Aragonite 100% (The Coral Sands in Hawaii) , Deionized water

Extra : Nitrosomonas and Nitrobacter (**Prodibio^R BioDigestTM** 1ml)

Contain no ammonia, nitrate, phosphate.

Microbiological, parasitological and virological analyses PetLife Laboratory, CA, USA.

None of Salmonella , Listeria monocytogenes, Helminthes (viable eggs) and Enterovirus.

Remark :

Keep out of reach of children.

Safe for human consumption.

Not recommend for freshwater plant.

Recommend for Malawi and Tanganyika in freshwater tank.

Best for reef tank.

Also safe for reptile use.
