Colorless and non-corrosive, AlgaeFix 1/2 controls many types of algae including "green water" blooms and filamentous algae

*

*** The preferred pond algae solution of experts & hobbyists alike**

Liquid algae control for ponds with plants and fish. Colorless and non-corrosive, AlgaeFix controls many types of algae including green or "green water" algae (*Chlorella sp.*), string or hair algae (*Cladophora sp.*), and blanketweed (*Oedogonium sp.*) in ponds that contain live plants. AlgaeFix controls existing algae and helps resolve additional algae blooms. It keeps ornamental ponds and water gardens clean and clear. AlgaeFix is safe for aquatic plants and fish. 8 ounces treats 2,400 gallons.

To use: Add 1 teaspoonful of PondCare AlgaeFix for every 50 gallons of pond/fountain water. Repeat dose every 3 days until algae is controlled. *Do not use with crustaceans, including crabs, shrimp, and freshwater lobsters.*

Purpose and Benefits: AlgaeFix is a liquid algae-control product for use in ornamental fishponds, water gardens, fountains, and freshwater aquariums. Approved for use in ponds and aquariums containing live

plants and fish. Controls many types of algae including "green water" blooms and filamentous algae and is colorless and non-corrosive.

Directions for Use: 8 fl oz treats 2,400 gallons. 16 fl oz treats 4,800 gallons. 64 fl oz treats 19,200 gallons.

Add 1 teaspoonful for every 50 gallons of pond/fountain water or 1/2 cup for every 1,200 gallons. Thoroughly mix into pond/fountain by adding near the pump outflow, waterfall, or aeration device. Can be mixed in a bucket of pond/fountain water and dispersed evenly around the pond/fountain. Repeat application every 3 days until algae is controlled. Be prepared to siphon out dead filamentous algae.

Once algae growth is under control, add one application per week. Weekly treatments will control algal growth and reduce pond/fountain maintenance.

Caution: Do not use AlgaeFix with crustaceans, including: crabs, shrimp, freshwater shrimp, and freshwater lobsters.

WARM WEATHER CAUTION: Before using, make certain that the pond has vigorous aeration; e.g., a fountain, waterfall, or aeration device to avoid fish loss due to low oxygen levels. When algae is removed by the filter or settles to the bottom of the pond, the oxygen level may drop to a harmful level if adequate aeration is not provided. Therefore, when using during warm summer months, adequate aeration is required.

***Do not shut off pond pumps and aeration devices at night.**

Note: For ornamental pond use only where all water is contained without any outflow. It is a violation of federal law to use this product in a manner inconsistent with its labeling.
